

State Route 91 | Roadway Rehabilitation Project

CALIFORNIA DEPARTMENT OF TRANSPORTATION

55 HOUR OFFRAMP CLOSURE – EASTBOUND SR- 91 AT EUCLID STREET

Project Update

The Department of Transportation (Caltrans) continues to move forward on the \$15.3 million Capital Prevention Maintenance Strategy Project along a 10 mile stretch of the SR-91 from Carmentia Avenue, Los Angeles County to Lakeview Avenue, Anaheim. Construction crews are rehabilitating the roadway by removing and replacing all existing broken concrete slabs, pavement and asphalt concrete on all general purpose and Highway Occupancy Vehicle lanes (HOV), revising HOV lane striping to continuous access, constructing ramp termini, and upgrading maintenance of all bridge structures within the project area.

The Rehabilitation Project has 320 working days with an estimated completion of October 2013. The contractor is All American Asphalt.

Planned Closure

The 55 hour, full weekend closure is scheduled from Friday, January 11 at 10:00 p.m. to Monday, January 14, 2013 at 5:00 a.m.

Due to unforeseen operational factors or inclement weather, these dates and times may change.

Every effort will be made to minimize the impacts of construction to motorists, residents and businesses. Changeable message and detour signs will be posted prior to the closure.

Detour Route

The suggested detour is to continue on the Eastbound State Route 91 until you reach Harbor Blvd. Exit north at Harbor and head westbound on Orangethorpe until you reach Euclid.

Project Benefits

Once the Eastbound SR-91 off-ramp at Euclid Street has been reconstructed, motorists will experience a smoother ride.

**SLOW FOR THE
CONE ZONE**

California law requires vehicles to safely reduce speed, move over, and merge into unoccupied lanes when emergency vehicles, construction vehicles, or tow trucks are displaying flashing warning lights.

Caltrans reminds motorists to use extra caution and reduce speeds when driving through construction zones.
